

Peterhead Port Authority—Smith Quay

New deep water, heavy lift quayside open for business

*What can
we do for
your
business?*

Operated on a common user basis, Smith Quay is an ideal berth for handling a wide range of marine trades. The site is well suited for projects which involve deep drafted vessels or require a large area of working space adjacent to the berth. Target trades include:

- Subsea
- Renewable energy
- Fabrication
- Project cargo

Whether you're looking for a long term base or a port for a single vessel call, please talk to us and see what advantages Peterhead offers.
